Summary

Full Stack Developer with 6 years catering background looking to break into my first web development role and creating life changing and meaningful applications. I've recently obtained a certificate in full stack development from the University of Birmingham. Originally undertaken a Mathematics degree, I'm a motivated problem solver who enjoys logical and analytical thinking, with a strong focus in mobile first design and development. I'm very passionate about developing web applications to build and change people's live and experiences for the better.

Technical Skills

HTML5, CSS3 (including Bootstrap and TailwindCSS), Javascript, jQuery, Node.js, Express.js, React.js, GraphQL, MongoDB, MySQL

Projects

| MoneyMail |

Deployed Link: <https://ss12932.github.io/currency-news-project/>

Github Repository Link: <https://github.com/ss12932/currency-news-project>

Worked as a project manager in a group of five to develop a currency converter application that allow holiday makers to make currency conversions abroad which also renders relevant financial news articles depending on input and target currencies. Learned tailwindCSS in less than a week and oversaw most of the structural and responsive layout of the application including refactoring codebase.

| Weather Dashboard |

Deployed Link: <https://ss12932.github.io/weather-dashboard/>

Github Repository Link: <https://github.com/ss12932/weather-dashboard>

Solely developed a weather dashboard as part of a takeaway weekly assignment from the bootcamp. This features dynamically updated weather info using the Openweather one call API to retrieve weather data for cities and use local storage to store persistent data.

| Code Quiz |

Deployed Link: <https://ss12932.github.io/js-code-quiz/>

Github Repository Link: <https://github.com/ss12932/js-code-quiz>

A timed coding quiz with multiple choice questions. The application runs in the browser and will feature dynamically generated HTML and CSS powered by Javascript. It also features a highscore section to gauge progress with fellow peers.

Experience

Sous-Chef | Co-manager

2016-present

Happy Chef Restaurant

- Oversaw most of the daily operations of the restaurant including stock control, ensuring compliance of sanitation and safety including food preparation, storage and use of kitchen equipment.
- Helped co managed the financial aspects of running the business including food costs, utilities, rent and maintenance.

Education

Certificate in Full Stack Web Development

2022

University of Birmingham

Diploma of Higher Education

2016

University of Bristol

A Levels

2012

King Edward VI College
